

## Survey 10: Collaboration

Please use the scale below to rank the level of your agreement or disagreement with each of the following statements.

1	2	3	4	5
Strongly Disagree	Disagree	Neither Agree nor Disagree	Agree	Strongly Agree

1. Good research depends on collaboration with other researchers. \_\_\_\_\_
2. Collaborations in research typically result in few if any problems. \_\_\_\_\_

*Problems in collaborations are likely to develop if*

3. planning is poor. \_\_\_\_\_
4. collaborators are contributing similar expertise (because it is more difficult to apportion credit for contributions of time than for a distinct area of expertise). \_\_\_\_\_
5. collaborators are from different research disciplines (because of different standards and expectations in different disciplines of science). \_\_\_\_\_
6. collaborations occur between academia and industry (because of different goals for the products of collaboration). \_\_\_\_\_
7. collaborations are multinational (because of cultural or language barriers). \_\_\_\_\_

*Before beginning a collaboration, researchers should discuss*

8. who will be responsible for what. \_\_\_\_\_
9. timelines for completion. \_\_\_\_\_
10. plans for sharing of raw data. \_\_\_\_\_
11. criteria for authorship. \_\_\_\_\_
12. order of authorship. \_\_\_\_\_
13. plans for how research products will be divided if the collaboration comes to an end. \_\_\_\_\_
